COLLECTION

THE HISTORY

The first solid-wooden cabinet was produced in 1995, handmade with traditional values and authentic craftsmanship. Made in Europe, only timber from well-managed, sustainable forestation are used to create timeless furniture & upholstery. With attention to quality and detail, growth came by offering diversity and choice: new models and designs, special finishes and hardware on request, in-house wood stains and paint facilities.

Speed, flexibility and variety have since that first cabinet attracted hundreds of clients worldwide.

THE PHILOSOPHY

Producing big design in small series, our furniture & upholstery stand for high quality, great functionality and strong character.

Every model ordered may be produced in a different colour or finish. The flexibility and variety makes every order special and unique, thus adapting to individual taste and expectations.

KNOBS AND HANDLES

FURNITURE

Natural variations occurring in wood or other materials are not considered defects and the colour-fastness or matching of colors, grains, or textures of such materials may be different from a product to the other.

All our standard furniture models are made of solid pine wood. Selected models might have MDF components - like door panels or sides of the flexi products - for stability and built-in reliability. Furniture made of solid wood is sensitive to the environment. Variations in humidity and temperature may cause the wood to swell or shrink, resulting in the occurrence of unevenness and small cracks. Knots and resin are completely natural. Regardless of whether the wooden furniture is waxed, painted or sprayed it can become scratched and dented if treated carelessly. Caution must be taken when using grime, grease and liquids.

Please follow the below care instructions to enjoy your furniture to the fullest:

- Do not place the furniture outdoors;
- Do not place furniture next to radiators, heating and cooling vents. Keep the wooden furniture at an even temperature with stable humidity. Recommended climate: temperature of 18-22°C, humidity between 40 to 60%.
- Cyclic changes in temperature in an unheated environment (cool at night, warmer during the day) can cause small cracks of the wood;
- Avoid direct sunlight, as this can cause cracking and deterioration of the colour;
- Do not put hot, scratchy or wet objects on finished surface; use tablecloth/ place mats;
- Avoid mechanical shocks by handling carefully. Never drag the pieces across the floor, as this will cause damage to the joints;
- For water based finishes use special wax oil recommended by your furniture retailer to maintain the surface's natural sheen and resistance against the liquids, stain and scratches. Apply the same wax on drawers or door's sliding shafts to ensure smooth gliding.
- Clean sprayed surfaces with a damp cloth using only water or mild soap and water solution and finish by wiping off with dry cloth.
- Do not use strong cleaning agents containing ammonia, alcohol or silicone.

UPHOLSTERY

All upholstery in our range is hand-made using solid, beech wood frames. Different quality foam, fabrics or leather may be used, as well as different paints or lacquers for the legs. Regardless of the chosen material or finish, damages can happen if treated carelessly and caution must be taken regarding grime, grease and liquids.

Please follow below care instructions to enjoy your upholstery to the fullest:

- Flip, rotate and fluff removable cushions regularly to ensure even wear and increase longevity.
- Tight, attached seat and back cushions will stretch and wrinkle with use. You can easily restore their appearance by smoothing the surface and tucking excess upholstery into the sides of the seat or back.
- To minimize fading, we recommend placing the upholstered pieces where they won't be exposed to direct sunlight.
- If moving your furniture, lift sofas or chairs by their bases to protect the frames. Do not drag or pull by the arms;
- Because dust and dirt cause upholstery to wear faster, we recommend vacuuming regularly with an upholstery attachment. Also vacuum before cleaning in any form.
- For spot cleaning, use a cleaning product that corresponds with your fabric or leather. Test any cleaner in an inconspicuous area first. Never use spot cleaners containing bleach or alcohol.
- You'll get the best results if you treat stains immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Don't rub.
- For persistent stains and overall cleaning, contact a professional upholstery cleaning company.
- An annual professional cleaning will keep your upholstery looking its best.

The photographs in the catalogue do not always faithfully reproduce the colours.

The dimensions in our catalogue are in CM and measured from the widest outside points, and may vary slightly. When exact dimensions are needed, please advise us when placing the order.

We reserve the right to make any change in design or finishes without prior notice.
